FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Neil C. Boyer, Manager
AT&T Wireless Services
7277 164th Ave. NE
Redmond, WA 98052

Dear Mr. Boyer:

The State of Oregon 9-1-1 Program, acting under a letter of agency for the Primary PSAPs in Oregon is requesting Wireless Phase II services for the counties of Multnomah, Clackamas, Washington, Marion, Polk and Lane. This request is official notice that the Primary PSAPs in these counties meet all the requirements of FCC 94-102, and the Second Memorandum Opinion and Order (FCC 99-352). Currently, these PSAPs have Phase I wireless E9-1-1 deployed and operating and are capable of handling the data elements associated with Phase II service.

The State of Oregon has completed the necessary upgrades to the Statewide Enhanced 9-1-1 Network to allow the network to receive the location information from the wireless carriers. Additionally, the State of Oregon funded customer premise equipment to all the Primary PSAPs in Oregon to enable them to utilize the data elements associated with Phase II service.

Therefore, having fulfilled the requirements outlined by the FCC in Docket 94-102, the State of Oregon 9-1-1 Program on behalf of the Primary PSAPs in Multnomah, Clackamas, Washington, Marion and Lane counties, is requesting that Phase II Wireless Enhanced 9-1-1 Service be provided in these counties from your wireless network. Furthermore, it is the position of the State of Oregon 9-1-1 Program that the provision of this service shall be in concurrence with the intent of the FCC's Second Memorandum Opinion and Order in CC Docket No. 99-352 order placing the cost of providing this service on the respective carrier. The public safety community expects the wireless carriers to meet the six month deadline for service provision of Phase II from the date of this request.
